

Tag and Organize Enterprise Knowledge

YOUR CHALLENGE

Information overload prevents businesses from properly surfacing business meaning and insight from their content.

- Digital Assets are not findable, comparable or query friendly
- Metadata is siloed, inconsistent, and unexplainable
- Content systems lack interoperability
- There is a lack of automation in the digital asset value chain

OUR SOLUTION

Fluree Taxonomy and Auto-Content Tagging

Best-in-class taxonomy and ontology management, auto-content tagging and dynamic vocabulary integration across domains.

Metadata Management

Centrally manage, maintain and integrate enterprise taxonomies with content-centric applications.

Unstructured Content Analysis & Tagging

Auto-Tag content using your metadata and enrich it by extracting valuable information from digital assets
